Profile

Narrative designer, game writer, and developer who turns story concepts into playable systems. Creator of browser, Pygame, and Unity projects combining environmental storytelling, mechanics-as-metaphor, state-based progression, character writing, and original fiction. Computer Science graduate comfortable working across writing, design, and implementation.

Selected Interactive Work

Fogbound Demo

Creator · Narrative Designer · Game Designer · Developer

Python / Pygame · Unity / C# migration · Active development

- Designed a 2D narrative side-scroller where fog, memory, perception, and words operate as gameplay systems.
- Created Whisper Vows that exchange thematic benefits for consequences, including Truth, Memory, Regret, and Nameless.
- Implemented traversal, combat, lantern and Relic mechanics, boss behavior, narrative events, persistence, and desktop/mobile input.

Fogbound V

Creator · Narrative Designer · Writer · Developer

React · JavaScript · Zustand · Vite

- Built a browser-based interactive narrative around looping traversal, persistent state, conditional events, and artifact discovery.
- Used environmental change, sound, fog, and withheld information to make player curiosity the progression mechanic.

EGO

JavaScript · HTML Canvas

Designed and implemented a three-stage game where Self Doubt, understanding, and Ego become mechanics; uncertainty slows the player, understanding expands ability, and Ego must be contained.

WorldWarMe

Unity · C# · Completed / Archived

Created an early 15-level game with platforming, combat, bosses, scoring, persistent collectibles, mobile controls, and narrative video sequences.

Professional Experience

International ESL Teacher

Shanghai, China · Jan 2024–Sep 2025

- Designed and delivered English-language instruction for international learners, adapting complex material for different proficiency levels and cultural contexts.
- Used storytelling, structured activities, and responsive communication to sustain engagement and improve comprehension.

Marketing Coordinator, Contractor

Just Right Reader · Jan–Jun 2023

- Maintained company web content and supported social media management and content creation for an education-focused organization.

Product & Design Strategy Intern

Ally Financial · Jun–Aug 2021

Designed a product concept intended to improve internal employee efficiency.

Software Engineering Intern

Apple · Jun–Aug 2020

Built a web tool for an internal Swift continuous-integration team using Vapor and Swift.

Education

Bachelor of Science, Computer Science

Alabama A&M University · May 2022

Recognition

Gucci Changemakers Winner · Apple WWDC 2019 Scholar · Forbes Under 30 Summit Scholar · I&E The Pitch Finalist · NASA Space Apps "Lean Forward, Fail Smart" Award

Skills

Narrative: Narrative systems, interactive storytelling, dialogue, character, worldbuilding, environmental storytelling, mechanics-as-metaphor

Game Design: Progression, state and conditional events, boss encounters, player abilities, systems design, audiovisual narrative

Development: Unity, C#, Python, Pygame, JavaScript, HTML Canvas, React, Zustand, HTML/CSS, Git
